Summary

- 9+ years developing large-scale data platforms (metrics catalog, semantic context) powering data agents, dashboarding, and experimentation.
 - Led high-performing 16-person engineering team, hiring senior talent, developing engineers through Staff level, and leading cross-org programs spanning 40+ engineers.
- Tech: Python, JavaScript (React, Redux, Relay), GraphQL, PHP (Hack)

Work

Staff Software Engineer / Engineering Manager, Meta

Jan. 2022 - Present

Semantic Models

- Co-created Semantic Models, Meta's primary context layer for data agents, scaling from prototype to 1,100+ models across 100+ teams in 7 months and powering 60%+ of business-critical analytics assets.
- Led Semantic Models platform development, unifying serving and discovery across first- and third-party agent ecosystems, and demonstrating 20-50pp agent accuracy lift on holdout evals.

Metric 360

- Helped scale Meta's metrics catalog from <100 users to 98%+ of Data Science and Data Engineering teams (95%+ employees) across 10 company pillars
- Led recovery of failed experimentation metrics migration spanning 100K+ active metrics; established SLAs & migration criteria, reduced platform APIs from 30+ to 3, built multi-stage correctness validation, 11%→60%+ metrics migrated in 5 months
- Built Meta's analytics governance platform: >7k business-critical metrics and dashboards tiered and certified, >100 compliance rules run hourly across 2M+ assets, 3k WAU viewing asset compliance reports

Senior Software Engineer, Facebook

Feb. 2019 - Jan. 2022

Integrated Analytics

- Leveraged OSS to build hyperparameter optimization for engagement and revenue time series forecasting; saved days of manual data science work every quarter
- Organized and co-hosted Facebook's first ever time series forecasting summit for 200+ attendees, including industry speakers from Uber and Google

Software Engineer, Oculus

Aug. 2017 - Feb. 2019

- A/B tested weekly app recommendation notifications resulting in +5% weekly active users, +6% timespent and +10% monthly revenue on the Oculus platform

Software Engineer Intern, Facebook

Jan. 2016 - Dec. 2016

Software Developer Intern, MetaLab

May 2015 - Aug. 2015

Software Developer Intern, Careerify (acquired by LinkedIn)

Sept. 2014 - Dec. 2014

Education

Bachelor of Computer Science

June 2017

Honours Computer Science, University of Waterloo, Waterloo, Ontario
